Why This Project Matters for the Bank ?

How do we proactively identify customers preparing to seek credit — before they apply?

Why This Matters

Timing determines whether the bank wins or loses an opportunity

Relationship managers need clarity, not guesswork

Early insight creates a competitive edge in engagement and retention

Our Project Focus

Build a system that gives the bank a timely, prioritised view of emerging credit demand, so teams can engage the right customers at the right moment.

Where the Bank Is Losing Value Today

Limited Applicants

Only **1 in 10** customers typically applies for business credit

Hidden Prospects

High-value prospects are **hidden in large datasets**

Wasted Effort

Sales teams spend time on **low-return contacts**

Missed Opportunities

Revenue opportunities missed or captured by competitors

The bank has data, but no reliable way to see who is ready *before* they apply

The Two Costly Gaps Behind the Problem

The Two Most Expensive Mistakes

Missing a Real Applicant

Result: Lost potential credit revenue and business growth.

Flagging Unlikely Applicants

Result: Wasted outreach time and resources.

A Predictive System Designed for Your Customer Base

Customer Data

Analyzes customer behavior patterns

AI & Analytics

Identifies patterns and likelihood signals

Priority List

Produces a simple, actionable ranking for teams

This turns complex data into clear, business-ready decisions.

What This System Makes Possible for the Bank ?

1

Identify High-Value Prospects

Pinpoint potential applicants before they actively seek credit, gaining a competitive edge

2

Optimize Outreach

Focus marketing and sales efforts on clients most likely to convert, maximizing ROI

3

Strengthen Relationships

Proactively engage with customers, building loyalty and preventing churn to competitors.

4

Increase Revenue & Retention

Boost credit revenue and improve customer retention through timely and relevant offers.

5

Improve Planning

Gain better insights for resource planning and forecasting future credit demand.

The Evidence: What the Data Confirms

Targeting the top 30% of customers captures approximately 80% of future credit applicants.

Scale & Reliability

1

100,000 customers analysed

2

200 behavioural indicators analysed

3

~90% reliability in separating likely vs unlikely applicants

Evidence

Turning Insight Into Action for Your Team

A simple ranked customer list that guides daily action

Clear direction. Clear priorities. Smarter deployment of staff time.

What This Means for Universal Plus Bank Moving Forward ?

We transformed raw customer data into a practical system that helps the bank

Act Earlier

Target Smarter
